Get Involved    				

Capstone projects are the culmination of students' learning experience at the University. They distill the knowledge and skills acquired in academic courses and apply them to a real-world project.

Award-Winning Capstones

**Capstone 1****Capstone 1****Capstone 1****Capstone 1**[View All 2018 Projects](#)

For their Capstone projects, students identify an information problem or need. They then develop the approach and methods needed to address the problem, conduct the research and present the findings in both oral and written formats. Capstone projects are developed during fall semester (September-December) and are implemented during winter semester (January through April).

The final piece is the Capstone event at the end of the school year. Students get the opportunity to present their projects to faculty, friends, family, colleagues, and sponsors as well as a panel of judges to be considered for a number of awards. It is the engineering faculties most popular and prestigious event of the year.
