Current Student

Be able to search/apply for clubs easily

Current Student

View detailed course schedules and classes

| search for clubs from engineering student page | narrow clubs down through search | choose club of choice and submit application | Find specific class through a search | View class specific descriptions |

Unscheduled

| Add clubs to engineering student homepage | Add search bar | Add applications for clubs | Design search boxes for classes | Provide detailed descriptions of courses |

Current Student

View student news/events easily

Current Student

Access to social media

View classes per semester

navigate to news/events from student homepage

choose news, events, or projects from organized lists

access additional info on specific story/event

have the university/engineering faculty use active social

Has details about who the lecturer is and prerequisites.

Add student news/events to student homepage

Organize by news, events, projects, other

provide more detailed description specific to what

University/engineering needs updated and relevant social media

Current Student

Having multiple techniques to gather info (not text)

have access to current social media pages

Get info on events or student activities from the pages

Identify all visual ways of learning from engineering page

choose method ex) text, pictures, videos, social media

gather the info using user desired method

Provide ways to utilize the accounts across the website

social media pages should provide useful info to students

Redesign web page from all text to something more

ex) adding pictures, videos, colours, school branding, social

Provide relevant info through chosen methods
